78mm Partitions

CONCEPT

The AZ[®] line is the benchmark for the fitting-out of commercial spaces. Acclaimed for its easy implementation, it provides solutions for all project contributors: designers, office fitters, occupants, and others. With its ongoing development, the range constantly offers new applications in line with today's trends.

A line to cover each of the most sought-after applications:

- AZ[®] "Essentiel"
- AZ[®] "Allure"
- AZ[®] "Fine"

We keep a stock of all the AZ[®] line's sections in several finishes, guaranteeing constant availability across all applications.

CHARACTERISTICS

Thickness 78mm
Structure Aluminium
Finishes Power-coated or anodized

Infills

Solid 12mm and 13mm thicknesses
Glazed safety glass, thickness 6–12mm / 33.2–66.2

Noise reduction

Solid infill applications up to 50dB depending on configuration
Glazed applications up to 47dB depending on configuration

Compliant with French building regulation DTU 35.1

OPTIONS

- Hinged or sliding door, face mounted or pocket
- Skirting and column with cableway
- Doorframes and corner posts with square or rounded design
- Acoustic performance increased by large mass
- Blinds

Our finishes are guaranteed by the most exacting and best known quality labels on the market.

We are active SNFA members (National union for window and external wall construction and related activities).

Our products are all backed by COV A certification (volatile organic compound emissions) and environmental and public health declaration sheets (FDES).

PRODUCT PLUS-FEATURES

NO LIMIT TO
the number of different arrangements.

SIMPLE AND QUICK
a single, universal cleat for assembling
posts and rails.

REMOVABLE AND REUSABLE
